WORK EXPERIENCE

All Star Technology · Karachi, Pakistan — JAN 2023 – AUG 2026
Unity Developer

- Developed a Unity-based gamified breathing exercise application for iOS using a Bluetooth spirometer.
- Integrated iOS API wrappers to simulate and visualize spirometer data in Unity.
- Worked alongside iOS and backend developers to create a seamless biofeedback therapy experience.
- Converted FDA-cleared respiratory metrics (FVC, FEV1, PEF, etc.) into in-game units for easy patient understanding.

WP Coders · Karachi, Pakistan — DEC 2022 – JUN 2023
Unreal Engine Developer

- Developed core gameplay systems for a multiplayer FPS in Unreal Engine, including gun mechanics, hit detection, health systems, inventory, and player interactions with enemy AI including roaming, dynamic attacks, and synchronized combat behavior.
- Built and optimized modular game maps, minimap/HUD systems, dynamic weather, and immersive environmental interactions.

Horizon Ventures · Karachi, Pakistan — SEP 2022 – DEC 2022
Unreal Engine Developer

- Developed and tested gameplay mechanics for Umran Metaverse, optimizing player movement, world interactions, and immersive experiences.
- Researched and prototyped VR features, collaborating with the development team to refine and integrate high-quality functionalities.

Red Cubez · Islamabad, Pakistan — FEB 2022 – JAN 2023
Unity 3D Game Developer

- Developed and optimized 2D/3D hyper-casual games in Unity, implementing gameplay mechanics, animations, AI/NPC behaviors, responsive UI/UX, and performance optimization.
- Integrated leaderboards, achievements, ads, and IAP, while conducting rigorous testing to deliver polished, engaging, and monetized game releases.

Family Business · Karachi, Pakistan — JAN 2012 – JAN 2021
